## Allow Moving Tractors On Purple Gas

Regulations governing the use of purple gasoline in farm machinery were amended recently, it was announced by Hon. E. C. Manning, Provincial secretary. The amendment allows farmers to move their machinery across a highway or "a reasonable distance" from one farm to another, without changing from purple gasoline. The act allows the purchase of purple fuel by farmers upon payment of 1c per gallon tax instead of the regular tax of 7c per gallon.

## Local Airman Dies in Africa

Friends of L.A.C. Jimmy Hewitt R.A.F., who passed away at Free-town, British West Africa, on June 27th, will be interested to know that his father recently heard from the matron of the hospital, to which he was admitted on June 14 prior to his death.

A Church of England chaplain stated also that Jimmy was buried with full military honors in the presence of many of his comrades by whom he is sincerely mourned. He died as a result of his service to his King and country and was laid to rest in cemetery by the sea in Free-town.

Mr. and Mrs. Hewitt and family of Cremona wish to express their sincere gratitude for the kind expressions of sympathy in their bereavement.

## QUICK CHANGE ARTISTRY

Gone with the wind and sun is that creamy complexion, stunning coiffure, and general well-groomed look you had last spring.

Be lovely again! You can with our specially planned renovating treatment.

## Will Honor Men In Uniform

Wednesday, September 10, will mark the beginning of the third year of Canada's participation in the war. In acknowledgment of that fact the government, by proclamation, is setting aside the period September 10-17 as a week to "honor our men in uniform and re-dedicate ourselves to the service of our country and our cause."

The provincial governments, mayors, service and other clubs, churches and schools are all being asked to lend their assistance in making this week, one of real national significance. The radio and the motion picture industry have already promised their full support.

## Prospective Students Must Register

Although in accordance with orders of the Health Department the schools in the province will not be opened until Sept. 15. The prospective students of the Didsbury School in Grades 9 to 12 will be required to register.

The teachers have made arrangements to be at the High School in the mornings, from Tuesday to Friday, Sept. 2 to 5, from 9 to 12 A.M.

Students must register in the courses that they desire to take during the coming year so that a timetable may be prepared before school opens.

The students will not be allowed to gather in groups, but must come individually to register.

Students from the rural district should make a special effort to register during this period.

## BIRTHS

at Didsbury General Hospital

July 31, to Mr. and Mrs. Roland Brown, a daughter.  
Aug. 4, to Mr. and Mrs. Earl Jones, a son.  
Aug. 7, to Mr. and Mrs. Roy Busschert, Cartaire, a daughter.  
Aug. 18, to Mr. and Mrs. R. C. Jones, a son.  
Aug. 18, to Mr. and Mrs. Axtell Neilson, a son.  
Aug. 24, to Mr. and Mrs. Arnold Blain, a daughter.  
Aug. 24, Mr. and Mrs. O. J. Arbour, a daughter.  
Aug. 24 to Mr. and Mrs. Ralph Blise of Olds, a son.  
Aug. 26, Mr. and Mrs. A. F. Gareau, a daughter.

## Bring in Your Scrap Aluminum

### HELP TO BUILD AIROPLANES

A drive Canada wide is being made for Scrap Aluminum and arrangements have been made for collection in Didsbury.

A large container of wood and wire has been placed on the land behind the Royal Bank by the Red Cross Society to help in their drive for Scrap Aluminum. The Red Cross is undertaking the drive at the request of the Department of National War Services.

Only worn out utensils and pieces of aluminum ware are wanted. Useful household articles and utensils should not be put into the containers, but anything worn out, broken or no longer useful should be given.

Aluminum is one of the most essential of war materials and is used extensively in the manufacture of aeroplanes and by gathering up the Scrap Aluminum across Canada the Red Cross is doing valuable work.

In all the large cities, both in Canada and United States an intensive campaign is being made. The campaign here is just as important and will continue to September 18.

## WEDDINGS

### IVEROCH—RANTON

Saturday afternoon in Calgary, the wedding of Margaret Lauder, eldest daughter of Mr. and Mrs. E. G. Ranton of Didsbury, to Mr. David Waters Iveroch, son of Rev. David Iveroch and the late Mrs. Iveroch of Winnipeg. The garden was a lovely setting for the ceremony where Rev. F. W. Locke read the marriage lines.

The bride wore a dressmaker's suite of queen's blue with navy accessories. Her corsage was of gladioli and sweetheart roses.

Mrs. Ranton was smartly attired in a sheer frock of navy and white with a corsage of deep red roses and and Mrs. Wm. White, aunt of the groom, chose a black tailored costume. Miss Katharine Iveroch, sister of the groom, was guest at her brother's wedding.

On their return from a wedding trip spent in Banff, Mr. and Mrs. Iveroch will reside in Calgary.

### Evangelical Church Notes

The subject on Sunday morning will be "The Helmet." In this sermon, the need of watchfulness for the Christian against evil forces is stressed. The subject in the evening service will be "What is the New Birth? How may I be sure that I am saved?"

Sunday School will be held at the Bethel Church at 2 P.M. and divine service at 3 P.M.

## Bridal Shower

Mrs. Bruce S. Parker entertained on Thursday last at a delightfully arranged miscellaneous shower in compliment to Miss Margaret Thurlow, whose marriage to Mr. N. Boychuk takes place in Calgary today, Thursday, August 28th.

The rooms were tastefully decorated with gladioli and sweet peas, the lovely shaded gladioli making an attractive centre piece for the tea table. Mrs. G. Gayfield and Mrs. F. Leeson poured tea and assisting were Misses Edith Pratt, Barbara Spence, Peggy Morgan and Margaret Ward.

The guest of honor was the recipient of many lovely and useful gifts which were placed in a prettily decorated basket and presented to her by Miss Barbara Spence, Peggy Morgan and Edith Pratt.

Each guest expressed their good wishes to which Miss Thurlow suitably responded.

How about buying your harvest shoes at Scott's from 250 up.

## Cut Retail Deliveries Of Gasoline and Oil

Gasoline and oil deliveries to retailers were reduced in an order issued Monday by Oil Controller G. R. Cottrelle.

Deliveries during the week August 25-31 inclusive will be 20 percent of total deliveries in the month of July, and during both September and October they will be 75 percent of July deliveries.

Mr. Cottrelle said the order, which applies throughout Canada, should not be considered as replacing the appeal for voluntary conservation. Rather, it was being made in support of the appeal. It was known that all citizens had not heeded the appeal, and it was hoped the curtailment of deliveries would "bring them into line".

He again asked motorists to cut down consumption, saying the situation now is more serious than it was five weeks ago when the appeal was launched.

## WORLD HAPPENINGS BRIEFLY TOLD

Robert Stewart, 68, British checkers champion, and reputed world record holder, died at his home in Scotland.

Further naval and artillery contingents from Newfoundland arrived at a west coast port recently, the Dominion's office announced in London.

A survey indicates that approximately 250,000 tons of abandoned street car tracks could be torn up and used as scrap steel in the United States defence program.

The minister of labor, Ernest Bevin, has issued a plea for persons over the age of 65 who are available and fit for work to register at employment exchanges in Britain.

An American Red Cross mission has completed the job of distributing nearly 20,000 tons of food, valued at \$4,000,000, in six months of activity in Spain.

Douglas Williams, director of the American Division of the Ministry of Information, will make a tour of the Far East to speed up service of pictures and news.

The German commissioners of shipping and social welfare in the Norwegian capital of Oslo have left owing to "ill-health" following demonstrations of Norwegians against quislings.

Sir Charles Portal, Air Chief Marshal, and other officers of the Royal Air Force have been awarded the decoration of the Order of the Polonia Restituta by the Polish government.

In canning 12,288 pounds of strawberry jam in New Brunswick to be shipped to the troops overseas, the Provincial Red Cross exceeded its quota 8,000 pounds by over 50 per cent.

### Camouflaged For Safety

**Special Train Used By Churchill Is Grimy-Looking Affair**

In a railway yard somewhere near London stands a dusty, grimy-looking train that is the most important in Britain.

Day and night it is ready to move at a moment's notice to practically any destination in the British Isles.

The train is the "P.M.'s Special," assembled in the early days of the war for the King and Queen but used now almost exclusively by Prime Minister Churchill.

It is made up of a sleeper, a saloon carriage and two or three other coaches. Its inconspicuous outward appearance is the result of strict orders for the protection of Mr. Churchill.

When it moves all trains along its route make way.

Larder shelves are always kept stocked and there is a good supply of the prime minister's favorite cigars.

He rarely spends the night in the train but uses the sleeper for the "cat-naps" with which Mr. Churchill intersperses periods of intense work.

One attendant assigned to the train describes him as the "hardest worker" he has ever seen and the "most understanding man to work for."

### Using Machines

There may be something in that soldier song stuff about it being a "lovely war" after all. The munitions and supply department announced "no longer need our boys spend dreary hours peeling potatoes" because the army now uses potato peeling machines and 155 were bought recently.

One office building in Germany is built to resemble a steamship.

### Famous Paintings

#### Valuable Pictures Decorate Rooms In A.A.F. Officers' Mess

Paintings which would do justice to an art gallery look down on officers at the mess of a Royal Air Force bomber station somewhere in England. The ante-room, dining room, card room and mess entrance are hung with valuable pictures, some loaned by the owner, others the property of the station commander, a connoisseur and collector.

Two of the finest pictures are copies of Titian's "Venus and Adonis" and of a Velasquez "Venus." There is a Pellegrini painting of "Venus and Cupid" and a Barolozi of nymphs at the shrine of Mercury. Another painting after Titian is the "Rape of Europa." There is a 1736 portrait of General Wade in armor.

The 17th century English school is represented by portraits of Charles I—in slashed green dress and lace collar—and of Charles II in Garter robes.

The card room has the most varied collection. There are French landscape engravings, dated 1790, modern paintings and old masters, a large needlework picture, and a delicately colored example of the work of the Japanese artist, Sesshu Oda.

This last picture, "The God of Happiness Playing With Innocent Children," was presented to the mess by a Japanese officer, attached for a short time to one of the station's squadrons.

### German Oil Shortage

#### Will Feel The Pinch Within Six Months, Says Expert

A British government oil expert declared that the Germans will be compelled to alter their blitzkrieg methods or cut their industrial consumption of oil unless they can capture Soviet Russia's Caucasus oil fields by early in 1942.

He said the first signs of a real shortage in the German army, navy, air force and industry would appear in six months.

The occupied nations used 16,000,000 tons of oil a year in peacetime, the expert said. He estimated their present maximum allowance from the Nazis is 3,200,000 tons.

In Germany there is no oil shortage affecting agricultural or industrial production at present, he said, due largely to an increase in production as a result of new synthetic oil plants.

Many of these have been bombed and newest ones are in Silesia and Czechoslovakia, almost at the limits of British bombing range, the expert explained.

"If the Germans get control of the yearly Caucasus output of 25,000,000 tons," he said, "they will be in a position to solve oil problems in Europe."

### London Owns Farms

#### City Supplied With Hundreds Of Tons Of Vegetables And Meat

The heart of London is now getting from its own farms hundreds of tons of meat and vegetables a year for the hospitals and other institutions of the metropolis.

London's citizens are the farmers of 4,000 acres, mostly within the Green Belt and in the midst of the "blitz" area. They own 1,500 head of pedigree cattle, 3,600 pigs, 7,000 head of poultry and 550 sheep.

In the year of the "blitz" these farms, run by the London County Council, produced more than ever before: 360,000 eggs, 550,000 gallons of milk, 351 tons of meat, 1,668 tons of vegetables and 81 tons of fruit.

They are even "digging for victory" in London's famous parks. Two hundred acres are being worked by borough councils for food growing. Sheep graze on 600 acres.

And in the centre of London alone individual Londoners are raising food from their allotments on 450 acres.

### Many Nationalities

The Rotary Club of Hankow—carrying on under Japanese occupation—has a membership of many nationalities. It has seven Americans, 12 British, 13 Chinese, five Germans, one Japanese, one Russian, three Sweden, and one Swiss.

A Surrey man claims to have caught a rat with two tails. That's nothing. Mr. Churchill is after one with a small moustache.

### DRESS, TURBAN, BAG ENSEMBLE

By Anne Adams

Assemble an ensemble—and be really smart this season! Pattern 4804 by Anne Adams includes a frock, a turban and a bag making a captivating outfit! The dress is in shirtwaist style, with novelty, scallop-topped revers, soft bloused bodice lines, and a gracefully cut skirt. The turban is in one piece, darted for fit, with a big, crisp bow stitched on front. And the bag, which slips smartly over your arm, is in just two pattern parts. The wide scalloped hemline band and the optional sleeve-bands of the dress are striking in contrast, matched by the revers, by the front-tying belt, and by the turban and bag. Watch heads turn when you wear this smart costume!

Pattern 4804 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16, entire ensemble, takes 2½ yards 39 cent fabric and 2½ yards contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

England's first daylight saving bill was introduced in 1908, but did not come into force until May, 1916.

### IN THE CANADIAN ROCKIES

Changing into "civies," H.R.H. the Duke of Kent and his staff relaxed like ordinary summer vacationists at Banff Springs Hotel in the Canadian Rockies, riding, golfing, hiking, picnicking and enjoying the sulphur baths. The Duke (second from left) is seen on Banff Springs golf course with J. A. Lowther, his private secretary; R. M. Deyell, manager of Banff Springs Hotel and Group Captain Sir Louis Gregg—Canadian Pacific photo.

### Blasting Berlin

#### Population Of This City Learning What It Means To Live In Shelters

Berlin has been promised the serious attentions of the Royal Air Force as soon as the lengthening nights gave the heavy bombers time to fly from British airports to the German capital and back in darkness. That time has arrived, and London says it's "Winter in Berlin."

This Battle of Berlin opened with an attack by a force of 200 to 300 British machines which included some of the most powerful bombers, some of the devastating new bombs. The fellows who invent the German official statements say little damage was done, but nobody in the world will take that seriously. British crews saw prodigious fires raging below them, saw the blaze from many miles away on the homeward route. We know, moreover, what German bombs have done to British cities, and no more are the Nazi centres immune to the power of high explosives.

Berlin now is added to the list of German military objectives within reach of the Royal Air Force, and the people of the German capital can count upon spending a lot of time in their shelters from this time on.

Before the coming winter ends the men and women of Germany will come to a hard understanding of the dreadful plight in which they have been put by the gangster leaders they accepted so readily, and cheer so valiantly when things go well. Germany, on the Western front as well as in the East, will learn about war from the receiver's point of view.

### Will Be Interesting

#### Exhibit Of Cartoons By Empire Artists Coming To Canada

An exhibition of British Commonwealth war cartoons will open at the national gallery, Ottawa, early in October and later will tour Canada from coast to coast. H. O. McCurry, gallery director, announced. It will include hundreds of original drawings by artists of Great Britain, Australia, India, New Zealand, Canada and South Africa.

### Visits Palace Four Times

Mrs. Keith Munro, wife of the chief constable at Gravesend, knows her way around Buckingham palace now. She has been there four times since war started twice with her son, Flt.-Lt. Alexander Munro, who received the D.F.C. and bar, and twice with her husband, awarded later the O.B.E.

### COMBATTING TUBERCULOSIS

Modern methods of combating tuberculosis have resulted in reducing deaths from that disease in all provinces of Canada, it is shown by Dr. G. J. Wherrett, writing in the Canadian Public Health Journal. The reductions vary from 64 per cent. in Alberta to 33 per cent. in Quebec. In Ontario it was 60 per cent. between 1921 and 1939.

One reason for improvement is that the disease is now brought to light much earlier than formerly, says Dr. Wherrett, but even now too many patients are admitted to sanatoria when their cases are already hopeless.

In order to diagnose the disease as early as possible, and before it has caused noticeable symptoms, the doctor recommends that surveys be made, especially among the following:

Contacts of known cases and deaths (ten times as liable to tuberculosis as other families); nurses and nurses in training; university and normal school students; teachers; high school and public school students; mental hospitals; mining and other industries; recruits for the army; domestic servants; mothers and Indian reserves.

Great increase is reported in the number of sanatorium beds available. There were fewer than 2,000 25 years ago; this year the total will be about 11,000. Ontario's position in this respect is particularly favourable, with no waiting lists at the sanatoria and with a death rate of 28 per 100,000 as against 63.8 for the whole of Canada.

### Separated For Year

#### Three-Year-Old Evacuee Did Not Know His Mother

Separated from his mother for one year, three-year-old Simon Christopher Dew, one of Canada's war guests, was unable to recognize her when they were reunited recently.

The mother, Mrs. Peter Dew, wife of a major in the Royal Engineers, rushed to greet her child upon her arrival here from England. He did not know her.

"You're my mummy?" he asked. "Where did you come from mummy?"

"From England," she replied.

"I came from England too," he said.

A botanist reported that in five years he pulled 37,639 weeds from a plot of ground ten feet square.

No one appreciates the perils of motoring like the pedestrian.

### MICKIE SAYS—

*DON'T BE A BUSINESS "HITCH-HIKER" DON'T LET TH' OTHER MERCHANTS DO ALL TH' ADVERTISING TO BRING TH' FOLKST' TO INN=DO SOME ADVERTISING' YERSelf*

## DAUGHTER OF DESTINY

—BY—  
Eleanor Atterbury Colton

### CHAPTER XX.

At first, as Devona stood staring at the almost insolent confidence written boldly in Jose Macias' face, she felt only anger and a passionate desire to dash something into that blandly confident smile.

The conceited boor! As if, by flashing his wealth, by indicating his decision—he could buy her, body and soul, just as he'd bought dozens of others. All his sorry procession of silly little Freda Camps.

Then, common sense laid a cooling hand on her temper. Now was no time to antagonize a man like Macias. Hadn't she seen that brutal anger he kept only lightly under control, strike down others. Wouldn't it be quite simple to strike her down here and now. She'd heard the houseboy slip out, quietly, only a few moments before. The doorman—any help—was too far away to be of any use right now. And her job, even her life, depended on her wits, now. If she were clever—

"Thank you. It's nice of you to ask me. But really—" and with casual reference to the watch on her wrist, "I'm only a poor working girl, you know. And it's late. I must run along. To-morrow's another work day, you know." And made her smile the most friendly gesture she could muster.

He only looked at her, his expression unchanged. The cat at the mouse hole, she thought again irreverently and suppressed a shudder.

"You know what I mean, Dona," he said finally, caught her hand, drew her toward him.

"Please, I—" and put a table's width, cleverly, between them.

Forced to release her hand, he bent toward her across the tiny, highly polished barricade. "I want you here, always, Dona. I'll give you what you want—what you should have."

"I don't know what you mean."

"I mean you're not the kind of girl that can take the long drudgery," he said, still waiting for the answer he wanted, obviously intended to have. "You're beautiful, sensitive, refined, educated—all that. You can't take this racket for long. You'll lose that beauty. You'll get hard, bitter, toughened like the rest of them. I know. I've seen it happen there. I want to save you from that."

And, Devona thought bitterly, how desperately she wanted to be saved! But not by Macias.

Right as he was, much as she loathed the prospect of a life as second, or even third, rate show girl, still, of course, what Macias offered, was no alternative!

"No, thanks. I like my life just as it is."

"No, you don't," he contradicted flatly. "You hate it down there. You're above the whole damned outfit, and you know it."

"That's not so—" trying hard

to make it sound convincing. "I'm perfectly happy to be independent and on my way to—"

"Sweetheart, you're not on your way to anything except what I'm offering you. Girls in your line don't last long," he reminded her, brutally. "You know that."

"Your kind of beauty can't take it, either. You've got circles under your eyes right now, and the night life hasn't done anything for the pretty, natural color you had when I first saw you. Another couple of years and you'll look old enough to be your own grandmother."

"Maybe," she flipped, lightly, her heart racing, "but that's the way I want it."

He smiled slowly, but, to her infinite relief, made no move toward her. "You're a strange little bundle. I've had lots of girls hand me different lines; but this is the first time I've had one go 'coy' on me."

"Is it 'coy' to want independence?"

"No; but it's not convincing." He reached for a handsome, tooled leather cigar box, selected a long, black cigar, lit it carefully.

Grateful for this chance to recruit her wits, Devona didn't answer. When, after a telling little silence, Macias looked at her, he smiled knowingly.

"Better drop this pose, Dona. Nobody believes it. Not even you."

She shook her head with determined briskness. "Sorry, mister, you've got the wrong number."

"I don't think so." Plunging one hand deep into his coat pocket, he drew out a long, blue velvet jewelers box, snapped it open, pushed it toward her across the table. "Maybe this will help you decide."

For a moment, Devona stared fascinated, at the glittering rainbow of blues and yellows and purples as the magnificent four-strand diamond bracelet caught the lamplight, shattered it into exquisite prisms. Only once in her life had she seen so many perfect stones gathered into one shimmering strand. And that had been a rainy morning in London when she followed a kind-faced English bobby around the iron-clad Tower chambers to see the royal crown jewels. A King's ransom, this, she realized with renewed terror. And unmistakable evidence of the strength of Macias' determination to have his own way.

He was still waiting, quietly. Turning a cool smile toward her, she snapped the box shut, pushed it back to him. "Lovely—but it's still no, thanks!" And now—please, I think I must go!"

That last calm little request was really only a desperate stab into darkness. But—to her amazement and infinite relief—Macias actually crossed the long room to the hall, spoke crisply into the house phone, "Have my car brought around at once."

Then, as he helped her into her coat, he laid heavy hands on her shoulders, forced her to face him. "I'm not giving up, Dona. You know that. But I can wait. And I'll wait patiently enough, unless—"

the dark eyes blazed suddenly, "unless I catch you giving me the run around for some other guy. I don't go in for any competition, you know."

"Well—" she tried to shrug a laugh at him. "I'm not promising—"

"I don't need promises. Young Brasher's out of the picture. That was plain enough to-night. From now on—there just won't be any one else. I'll see to that."

An hour later back in the narrow barrenness of her tiny hotel room Devona paced restlessly. Play the game with Jose Macias and be "taken care of." That prospect certainly wasn't encouraging. But what could she do?

Back and forth she pursued the question. She could leave now, of course, before it was too late. Leave, but for what? Another job? But Macias held her contract, and while as a legal document it was probably worthless, still Jose Macias would use it to boycott her every effort. She'd seen that work out before. Just his word to the musicians' union and there wouldn't be a single job in Los Angeles open to her. Only last week the nice young boy who'd played the drums in Macias' band had tried to defy him. He hadn't found a job yet.

She knew now why Manuel had only smiled at her, shook his head. "You don't know Macias. Once he

**10c  
WHY  
PAY  
MORE**

THE WILSON FLY PAD CO., HAMILTON, ONT.

makes up his mind about anything, there's no changing it—or beating him out of getting his own way. You watch. That boy will be on relief before the week is over!"

And he was—at least a candidate for the bread line. It was the discouragement, the frustration mostly. The boy was licked and he knew it. It wasn't a very happy example.

But if she stayed on—then what? Macias would wait, he'd said. Tirelessly, persistently, he would wear down her resistance, binding her hand and foot until she bent to his will. Until she—Devona Raebourne accepted the destiny that poor silly little Freda Camp, and the others before her, had accepted.

Shuddering, she slipped out of her clothes, into the hard narrow bed, and snapped off the light. She wouldn't accept that fate, of course, her tired brain assured her doggedly. But it refused to find a way out. To-morrow, she told herself, she'd think of something. To-morrow she'd think of a plan, a course of action. To-morrow.

The word broke on a sob. To-morrow and to-morrow and to-morrow! What was to become of her?

Always the sinister future. Always signals of danger ahead. Always haunting fears stalking right beside her fear that she couldn't pay the rent for this miserable room, fear that again she'd know the torture of being hungry and penniless, fear that in all the world no one would care if she did starve. That was the worst one. The loneliness.

Why was it that she must fight on, thus, alone? And what would become of her, she asked her pillow miserably as she released the tears that choked her, scalded her eyes.

What could become of her now that her puny strength was challenged by ruthless persistence like Jose Macias?

She could fight, a stubborn remnant of her old courage, told her calmly. She could use her every will, her every last shred of intelligence, of skill to outwit this man. She could! She'd have to. No skirmish was won by accepting defeat first.

Sitting bolt upright in the cool darkness she dried her tears, thumped her tear-wet pillow back into shape. They couldn't get her down—not Manuel's cynical warnings, not Dale's indifference, not even Macias' bold determination. She wasn't beaten yet. There was a way out of this and somehow she'd find it.

She fell asleep finally, exhausted. But her dreams were tormented and she tossed feverishly, waking often. So that morning found her still pale, still hollow-eyed and still groping for a solution to this new problem life had presented.

"And what will to-day add to complicate that problem?" she wondered aloud as daylight crept in at the window, pushing the new day and new decision toward her ruthlessly,

relentlessly. She pulled herself out of bed. There was no turning back ever. It was always just a case of holding out a little while longer.

(To Be Continued)

The average speed at America's first automobile race Nov. 28, 1895, was 7½ miles an hour.

Broken dolls are not thrown away in Japan. They are buried in school playgrounds every June.

In Corinthia, Nicaragua, soap is made in the shape and size of cigars.

West Africa is the largest French colony.

There are approximately 15,000 separate parts in a modern automobile.

Best Attainable Image From Document Available

### Served Same Purpose

**Elephants 2,000 Years Ago Did Work Of Modern Tanks**

Like most weapons of modern mechanized warfare, the massive tanks that thunder through Europe to-day had a military progenitor over 2,000 years ago: a mammoth machine of mobile armor—the elephant.

It's fair to compare the tank with the war elephant, according to the American Society for Metals' headquarters at Cleveland, Ohio, because they served the same purpose—to force a break through for infantry.

Modern tanks must be protected against ever-improving anti-tank guns by better and better armor, which has called for constant research by metallurgists for tougher steel alloys—chromium, nickel, manganese and the rest. The elephants were armored, too, but with their own tough hides. Additional man-made protection covered their vital regions.

Like the tank, the elephant carried a crew equipped with weapons for attack. The crew rode in an armored "howdah," carried bows, arrows and spears, instead of the machine gun and cannon of our modern tanks. When elephants were used by Carthage in its long wars against Rome, the Romans at first turned and ran. Then they discovered that the huge animals had an Achilles' heel, that if the veins in their back legs were slit, they became helpless.

In spite of this one weakness elephants continued to be an important part of the Carthaginian war machine. When Hannibal made his famous march from Spain across the Alps into Italy, he took along a train of elephants. They acted as "trucks" too, on journeys like this, because each elephant could carry a big load of war equipment and material. They were also more effective in the narrow Alpine passes than horse or ox-drawn carts.

### GEMS OF THOUGHT

#### SELF-RESPECT

No more important duty can be urged upon those who are entering the great theatre of life than simple loyalty to their best convictions. Chapin.

To have a respect for ourselves guides our morals; and to have a reverence for others governs our manners. Sterne.

What has an individual gained by losing his own self-respect? or what has he lost when, retaining his own, he loses the homage of tools, or the pretentious praise of hypocrites, false to themselves as to others? Mary Baker Eddy.

He that respects himself is safe from others.

He wears a coat of mail that none can pierce.

Longfellow.

Self-respect is the noblest garment with which a man may clothe himself, the most elevating feeling with which the mind can be inspired. Samuel Smiles.

It is necessary to the happiness of man that he be mentally faithful to himself. Thomas Paine.

### Breakfast In Britain

#### Bacon And Eggs Are Things You Cannot Have Now

If we had some bacon we could have eggs-and-bacon; if we had some eggs such must be the frie but still poignant reflection of many a hungry man as he sits down to his Woolton breakfast.

There is bacon in the house, he is sternly told; and there are eggs, but they are wanted for lunch, and he must remember that there is a war on and make the best of some stuff called a cereal or is it a serial, because more of it turns up every day; and bread with a pinch of vitamin Q in it and half a teaspoonful of jam soon to be replaced by "concentrate" which is the same thing with multiplication of syllables and subtraction of sugar.

His thoughts go obstinately straying back to the breakfasts of his youth. London Times.

In Corinthia, Nicaragua, soap is made in the shape and size of cigars.

West Africa is the largest French colony.

### HOME SERVICE

#### RICH LOOKING DRAPERY YOU CAN QUICKLY MAKE

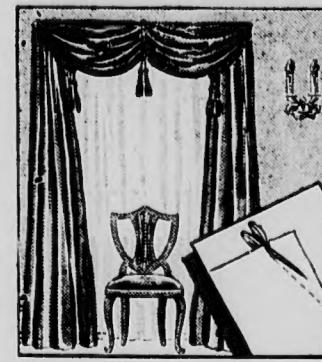

Diagram Shows Cutting Of Swag

What an air these curtains have! Imagine an apricot sateen draped in that stunning swag effect—or a soft moss-green damask.

But smart as these draperies are, you can easily make them yourself. One piece of material makes a side drapery and half the "swag"; it's just a simple trick of cutting and draping.

Measure two lengths of fabric as for side draperies, but add to each several extra inches—more than half the width of your window. Now cut, slanting one end of each length as the diagram shows. This is your swag end.

Gather up the longer edge of each swag end in graceful folds, stitch down and join ends to form one continuous swag. Now sew a tape along the top of the swag and tack to the valance board.

Three tasseled cords complete the picture. Stitch one cord down the swag's centre, the others as if looped from the ends of the valance board.

You can as easily make handsome curtains for every room in your home. Our 32-page booklet gives step-by-step directions for glass curtains, drapery-curtains, formal draperies. Shows how to measure, cut, sew, trim and hang. Has directions for valances, swags, cornices.

Send 15¢ in coins for your copy of "New Ideas in Making Curtains And Draperies" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15¢ each:

168—"Etiquette: The Correct Thing To Do"

193—"Fashion Drawing Made Easy"

WP—"Woodcraft Patterns"

198—"Announcements, Showers and Birthday Parties"

130—"World's Best-Loved Poems"

121—"How To Improve Your Vocabulary"

### The Nazi Way

#### Rules Of Warfare Worse Than Those Of Dark Ages

One would think that the Russians would not have to try very hard to rise to the level of what the Nazis call "the European rules of war."

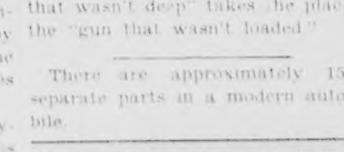

The European rules, as the Nazis have interpreted them in practice, do not derive from those established by the late Marquis of Queensberry. The Russians would be following the Nazi code if they dropped behind the German lines disguised as nursemaids or housewives, with bombs and machine guns under their skirts; if they butchered kindly German hosts who had received them when they were hungry refugees; if they infiltrated the German army and gave false orders to the German troops; if they took pride in their bag of women and children; if they lied, cheated and pretended to be friends in time of peace in order to achieve a more complete betrayal in time of war. New York Times.

Since the war's start the Royal Canadian Navy has convoyed Atlantic shipping carrying a total of more than 27,000,000 tons.

The varied climate of British Columbia provides for a greater diversity of farming enterprises than in any other province.

In swimming season the "water that wasn't deep" takes the place of the "gun that wasn't loaded."

There are approximately 15,000 separate parts in a modern automobile.

**The Need For Fuel.**

Consumption of gasoline and oil in Canada helps to win the war only where it serves war industry, and other industries that in turn support the war effort, army vehicles, training planes and naval craft

If Canadians were wholly intent in their ambition to leave nothing undone that should be done to insure a Victory against Hitler, most of the balance of motor fuel stocks in Canada would be put at the disposal of the fighting forces overseas. If Canadians really understood just how precious motor fuel will be in the scheme of operations soon to be launched by the British Empire forces, they could not possibly use up gasoline and oil for pleasure purposes without pangs of conscience.

In the British Isles, where motor car drivers are so close to military operations that they can see the urgent necessity for guarding the motor fuel supply, private motoring has become almost non-existent. On this continent we need only use a little more native intelligence to enable us to see the picture more as our compatriots across the seas do. Then Canada's gasoline consumption will really drop sharply.

**The World of Wheat**

By H. G. L. Strange

Director, Research Department,  
Searle Grain Company, Ltd.

Wars usually upset normal agricultural practices.

Some products which are in demand in peacetime can hardly be sold in wartime, and some products which in peacetime can hardly find a market, are most eagerly sought after by buyers in time of war.

There is always a natural tendency for farmers to accommodate themselves to changed wartime demands and it is all necessary, of course, to be done whenever our own people, or the people of our allies, suffer from a lack of food.

It is most important to remember however that many of these new demands, or these sudden lack of demands, will be only temporary, and that the entire picture once again will be changed as soon as the war is over.

Farmers, therefore, while naturally being most anxious to provide new kinds of foodstuffs which are scarce and which are badly needed, should keep in mind the simple fact that their new practices most probably will again have to be changed as soon as the war is over. An appreciation of this simple fact may help to save our farmers many a heartbreak and much loss of revenue when the war is over.

Following factors have tended to raise price: More than 25 million bushels of Canadian wheat may be lost owing to sawflies - Australia's wheat production in 1940-41 approximately 83 million bushels, smallest since 1919-20 - U.S. Congress has passed a bill "freezing" government loan stocks of wheat for the duration of the emergency.

Following factors have tended to lower price: Moisture conditions are excellent in Argentina - The 1941 European wheat crop is estimated at 1,270 million bushels, up 125 million from 1940 - Wheat crops of Australia, U.S.A., China and Turkey are expected to be better than last year.

**The Price of Wheat**

With the cost of manufactured goods and most commodities rising steadily, the price of wheat is at a ridiculously low figure. On the basis of 70c a bushel for One Northern at the terminal, the average price to farmers at local shipping points in Alberta, after averaging grades, will be around 50c a bushel. Even with a big crop such a price is profitless. Alberta's wheat crop this year is less than half of last year's output which makes the price situation even more acute.

The Wheat Pools of Western Canada are endeavoring to induce the federal government to increase the price of wheat to \$1 a bushel. In the United States, wheat farmers are obtaining approximately \$1.16 a bushel through a guaranteed minimum price and special bonuses. That figure is considered a parity with other prices.

In Western Canada, farmers have higher costs than in the United States and \$1.25 a bushel could be considered as a parity with other price. The figure of \$1 a bushel is not unreasonable.

**Notice of Poll Tax**

Westerdale M.D., 311

A minimum tax of four dollars for municipal purposes shall be paid by every person assessed upon the assessment and tax roll in respect of any property in case the tax payable by such person in respect of such property in any year amounts to a sum of less than four dollars, and an annual tax of four dollars shall also be paid by every resident of the district of the fullage of twenty-one years who has resided therein for a period of one month or more during any calendar year and is gainfully employed and has not been assessed upon the roll, whether he has resided in the district before the date of the completion of the roll or not; but in the case of the collection of such tax, the name of such resident so paying shall be added to the roll of the said calendar year.

Every employer shall furnish from month to month, upon request of the secretary-treasurer, the names of all persons in his employment, and the secretary-treasurer by a notice in writing may require the employer or employers to deduct from the next payment made to any employee who is named in the notice and has not paid any tax for the payment of which the employee is liable under the said sections, the amount of the tax, and to forward the same to the secretary-treasurer immediately after making the deduction hereinbefore directed.

A. McNAUGHTON,

# A MESSAGE... To Alberta Farmers

The suggestion is offered to Alberta grain producers that wherever possible they should deliver their grain to Alberta Pool Elevators, thus strengthening and building up a purely co-operative organization owned and operated by Alberta farmers.

Alberta Pool Elevators has been singularly successful in developing on co-operative principles the largest grain handling organization in the province; establishing an equitable and fair standard of service for the benefit of all farmers; and in obtaining, in conjunction with its sister pools in Manitoba and Saskatchewan, through constant contact and intercession with the government of Canada, a measure of price protection and other benefits for the farmers of the western provinces.

It is of the utmost importance at the present time that farmers should have a strong organization to speak for them. The greatest weakness of the farmers' position, from an economic standpoint, is individualism. Farmers must unite if they are to escape being completely submerged.

The Wheat Pool offers a natural rallying point for the farmers. Being founded on true co-operative principles, it is not concerned with politics, religion or national origins.

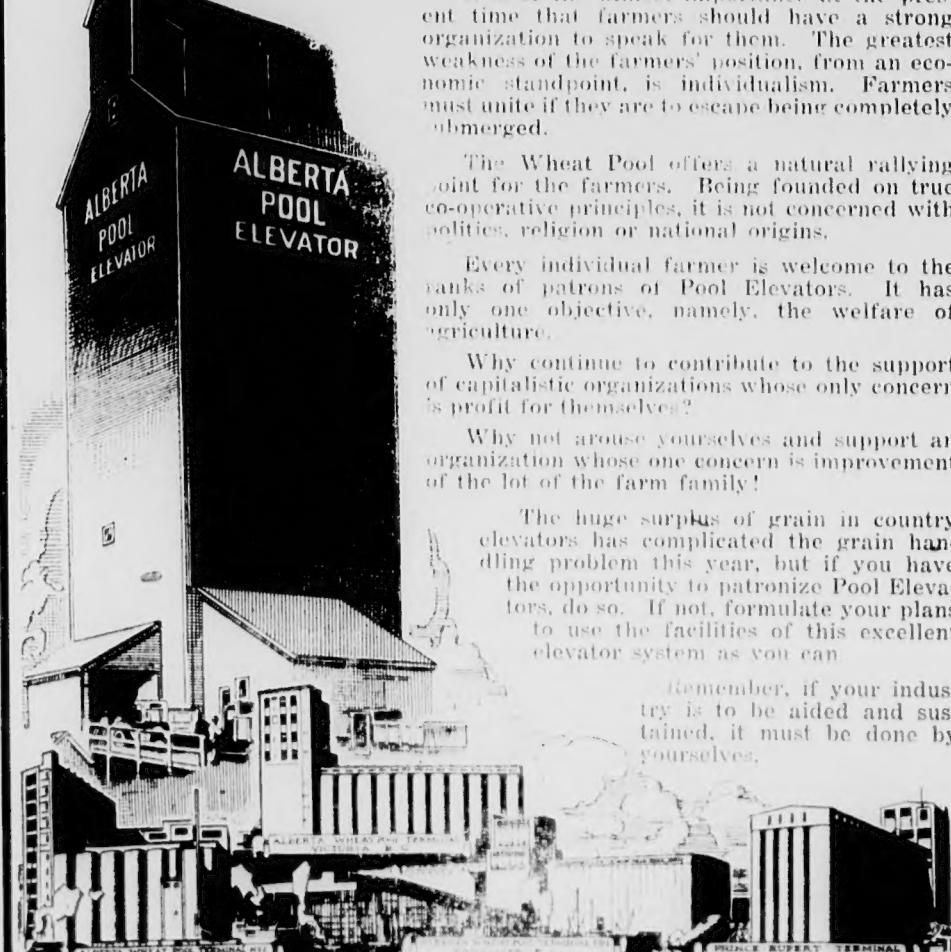

Every individual farmer is welcome to the ranks of patrons of Pool Elevators. It has only one objective, namely, the welfare of agriculture.

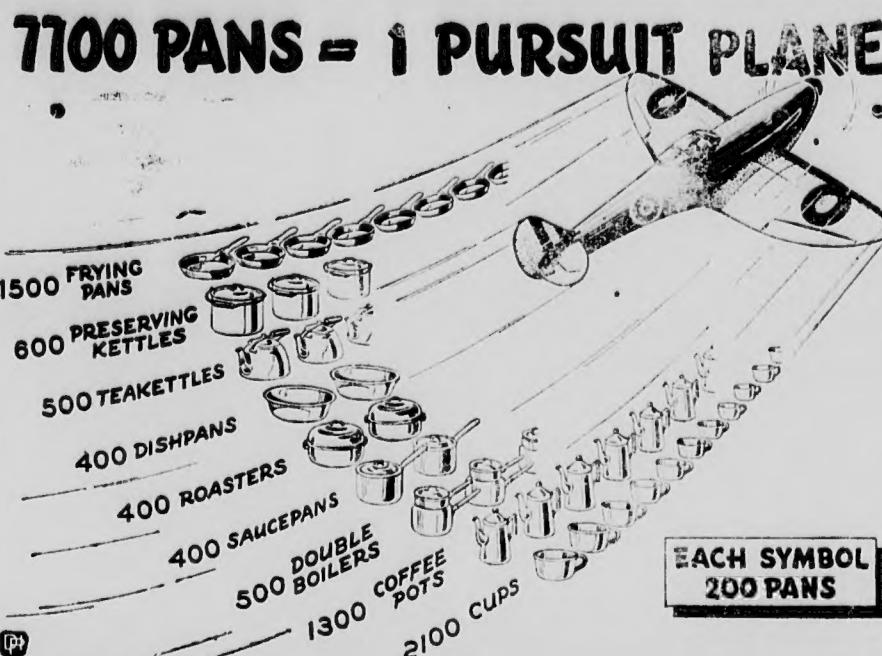

Why continue to contribute to the support of capitalistic organizations whose only concern is profit for themselves?

Why not arouse yourselves and support an organization whose one concern is improvement of the lot of the farm family!

The huge surplus of grain in country elevators has complicated the grain handling problem this year, but if you have the opportunity to patronize Pool Elevators, do so. If not, formulate your plans to use the facilities of this excellent elevator system as you can.

Remember, if your industry is to be aided and sustained, it must be done by yourselves.

**Alberta Pool Elevators**

The amount of aluminum used in a modern pursuit plane is indicated in this chart, which is based on data prepared by technical experts. It is issued by the National Salvage Headquarters, Ottawa.

### Around Alberta.

#### Grain Shortage

Canada is faced with serious shortage of coarse grains according to Major H. G. L. Strange of Winnipeg. Major Strange was a visitor to Edmonton during a recent trip, inspecting Alberta crops. Reduced acreage and drouth conditions in many farm areas are responsible he said. Major Strange suggested that farmers substitute wheat for coarse grains in feeding livestock. Under prevailing conditions wheat may prove "not much more expensive than barley and cheaper than oats," he stated.

#### Milk Prices Raised

Consumers of milk and cream in Edmonton, Calgary and Lethbridge are paying more for their privilege since announcement was made of an order by the board of Public Utility Commissioners. Prices have gone up one cent a quart for milk, two cents a pint for "Superior" milk and two cents per half-pint for cream.

The price increases were announced recently by G. M. Blackstock, K.C., sole member of the utilities board, and came after an application from milk producers for such action. Mr. Blackstock said that he was convinced that producers were not receiving enough to meet increased wages and other farm costs. By the new order milk producers are granted an additional 3¢ cents per hundred pounds of the product. The same order allows skimmed milk to be sold for the first time, the price being set at 5¢ a quart or 15¢ a gallon.

Director, Agricultural Department  
North-West Grain Elevators Association

#### Grain Storage

Beyond a doubt, the safest place to store grain is in a licensed country or terminal elevator. However, it is not unlikely that considerable quantities will, if necessary, be stored on the farm.

If sound weather-in-for farm storage is inadequate, information on suitable inexpensive structures will be welcome.

An excellent bulletin entitled "Storing Grain on the Farm" has been issued by the Manitoba Department of Agriculture and Immigration, Winnipeg. Several types of temporary and permanent structures are described and illustrated, together with details on construction. There are few, if any, farmers to whom this bulletin will not be of use. Morrisons, show fence bins and woven wire bins are not costly and if properly constructed, will keep grain in good condition. They must, of course, be covered with hay, straw or sheaves.

Circular No. 34, distributed by the Agricultural Extension Service, Department of Agriculture, Edmonton, also contains a number of useful suggestions, particularly respecting covering for temporary bins and protection against damage to grain at入库 bottoms caused by soil moisture.

It is unwise to leave grain on the field in unprotected piles. It can be protected at very small cost by methods described in the two above-mentioned publications.

For special problems, information can be obtained from Departments of Agricultural Engineering at the Universities of Alberta, Saskatchewan and Manitoba (Edmonton, Saskatoon and Winnipeg, respectively).

## Power In Wheat?

Hard on the heels of an editorial in this column urging that further research and experimentation into the economic feasibility of converting some of the Canadian wheat surplus into power alcohol as a substitute for gasoline comes an unofficial announcement from Ottawa that the federal government is considering that very thing and has held a preliminary conference with experts on this question.

The *raison d'être* for the suggestion which, it is gratifying to note, has not fallen on deaf ears, was, of course, the necessity for putting to some useful purpose a commodity which is, at present, a glut on the market, if it can be said to be in the market at all, combined with a desire to explore every possible avenue of providing new income for the farmers, who are not now reaping more than a bare living from their operations.

Since that time, another development has taken place which should furnish an additional incentive to prosecute a vigorous search for a new outlet for wheat. Reference is made to the urgent necessity for conservation of gasoline for the war effort, a necessity which suddenly became so apparent that the government, through the oil controller placed drastic restrictions on the sale of motor fuel and appealed to the public to reduce pleasure driving by at least 50 per cent. The need for these measures, to be followed perhaps by rationing of gasoline, accentuates the importance of endeavoring to locate some other source of motor fuel.

### Serve Double Purpose

If the conversion of wheat into power alcohol can be demonstrated to be economically feasible, the use of wheat for this purpose would serve a double purpose. It would assist in conserving gasoline and it would be at least a partial solution of the almost over-powering wheat problem.

Unfortunately, the article appearing in the daily press to which reference has been made is not overly optimistic, since it quotes the opinion of some of the experts attending the conference to the effect that the cost of processing would be so high that the price that could be paid for wheat used for this purpose would be so low that it would not pay the cost of growing and harvesting it, or, in the alternative, the government would have to subsidize the wheat grower.

The conference had before it a report of Dr. W. D. McFarlane of Macdonald College in which he estimated that "the most of the fuel, if wheat were 60 cents a bushel would be 53.4 cents a gallon" on the basis of production in a \$3,000,000 plant located in Winnipeg. "Such a plant, it is estimated, would incur an annual loss of \$1,163,400, or a loss distributed at the rate of 60.7 cents a bushel on the wheat consumed." This result is based on the operations of a commercial plant which would use 1,915,200 bushels of wheat a year, produce 10,000 gallons of power alcohol per day at the rate of 1,827 gallons from each bushel of wheat and producing by products of the value of \$20 a ton.

But the committee also had before it a report of a Polish engineer, Dr. Rotstein on a process known as the Melle system, used in Europe which placed a figure of 38 cents a bushel as the economic loss on wheat priced at 60 cents a bushel. That is to say, the factory could pay 22 cents a bushel for wheat for conversion into power alcohol if the European process were followed.

### Need For Experimentation

The story of the conference indicates, however, that there was wide disagreement between the experts in session on the questions of costs and relative values, a further argument of the wisdom of conducting more research and further experimentation, not only to secure more accurate data but also to determine the most efficient and most economical methods of manufacture and processing. This could be done, as suggested at the conference, by building a pilot plant at an estimated cost of \$300,000, and again, the figure, it is stated, is a subject of dispute among the experts.

When the magnitude of the wheat problem in Western Canada is taken into consideration, and even though a commercial plant might only take care of one or two million bushels of wheat a year, it would seem desirable to spend \$300,000 or even more, in a practical effort to determine the economic feasibility, or otherwise, of such an undertaking.

If only a few million bushels could be used annually for the production of power alcohol, a few million bushels for the production of plastics and several million bushels more in other outlets, the problem would be partially solved. Theory solves no problems. It requires experimentation and practical application of the results of experimentation and these things cannot be done without some expenditure.

### Australian Inventor

Was Responsible For Device Used To Defeat Magnetic Mines

The Patents Office Journal revealed that an Australian mining engineer, Franklin G. Barnes, developed the degaussing device which defeated the German magnetic mine menace to British shipping early in the war.

The Journal said Barnes was in England in November, 1939, when the first magnetic mine was recovered in a British ship. At that time, many British ships were being sunk by that method. Six days later the Journal said Barnes filed specifications for a device whereby the mines could be neutralized by placing electric cables around ships.

### Turn About

Fred C. Tatton, Marysville, Calif., read somewhere you could quell a bucking bronco by biting its ears. He tried it on his mount in a donkey softball game. The donkey bucked once more, grounded Tatton and hit him on the forehead.

A finger ring with a built-in cigarette lighter has been patented.

The halibut is the largest of the flat fish.

## Nervous Restless Girls!

Cranky? Restless? Can't sleep? Tire easily? Annoyed by female functional disorders and monthly distress? Then take Lydia E. Pinkham's Vegetable Compound, famous for over 60 years in helping curb rundown, weak, nervous conditions. Made especially for women. WELL WORTH TRYING!

### Quality Shopping In London

British Develop Selective Ability Since Clothes Were Rationed

London is settling down to the workings of fashion under the rationing system for clothes. Reckoning that the country over, women in England ordinarily bought items amounting to some 200 coupons each year, the Government decided to cut the numbers of these dress items down to some 66 coupons' worth in a year.

What can a woman get for 66 coupons? A coat takes 14 of them, a woolen dress 11, a silk dress seven, a blouse or cardigan five, a skirt seven, shoes five, a pair, stockings two coupons a pair, each yard of woolen material bought to be made up three coupons leaving still lingerie and oddments to buy.

Limiting only the number of garments a woman can buy and not the expenditure per garment has already had the effect of increasing quality purchases as against a multiplicity of purchases at lower prices.

The coupon system already begins to make its mark on the designs of the London couture. Fabrics chosen have smooth surfaces and close weaves to stand wear and stretch and to avoid any catching of surface threads. Difficult patterns are rejected; big patterns waste material in joining and matching at seams. Small patterns cut into far less yardage.

Classical suits are bought which look as good next year as this. The slim line which has been increasingly used during the past months is ideal because it again does not use too much fabric. Jackets will be slightly shorter in cut.

**Britain's New Tank**  
**Lighter But Tough Machine Has Been Named The Covenanter**  
The latest British tank to be taken off the secret list, a 15 to 16-ton sister of the slightly heavier Crusader, has gone into mass production and has been named the Covenanter by Minister of Supply Lord Beaverbrook.

The Covenanter combines a speed of 30 miles an hour with remarkable manoeuvrability, excellent armor and formidable fire-power.

### A Good Explanation

Count Ciano, Italian foreign minister, has been explaining the determined stand of the Russians in the face of the German attack saying: "In order to understand the Russian resistance the Slavic racial qualities must be taken into consideration. These qualities are fundamentally great physical strength and exceptional psychology for tolerating hardships."

At St. Mihiel in the First Great War the allies fired 1,000,000 shells from one front in four hours.

People who are up and doing are never down and done.

## Tie up to Ogden's!

Ask any old timer how to get the greatest satisfaction from rolling your own and he'll tell you to tie up to Ogden's—the light green package that is your green light to the best smoke of your life! For Ogden's isn't "just another fine cut". It's different, gorgeously different—a distinctive blend of choicer, riper tobaccos. Try it today.

Only the best cigarette papers—*"Vogue"* or *"Chantier"*—are good enough for Ogden's.

## OGDEN'S FINE CUT

Pipe Smokers!  
Ask for Ogden's Cut Plug

### Women Workers

#### California To Use Women In Aircraft Factories

The demand for more defence labor, particularly in the mushrooming aircraft industry, is forcing California to turn to women to swell its reservoir of workers. R. G. Wagener, state director of employment, says there is no question but that employment of ever increasing numbers of women in the construction of vital defence weapons is coming.

The use of women in airplane factories, munitions plants, in the making of tools and in industries not directly connected with the defence program, thus freeing men for heavier work, would substantially increase the state's sorely taxed manpower, Wagener believes.

"Roughly speaking, certain industries could substitute women for 25 to 40 per cent of their workers."

### SELECTED RECIPES

#### ALL-BRAN MUFFINS

2 tablespoons shortening  
1/4 cup sugar  
1 egg  
1 cup All-bran  
5/8 cup milk  
1 cup flour  
1/2 teaspoon salt  
2 1/2 teaspoons baking powder

Blend shortening and sugar thoroughly; add egg and beat well. Add All-bran and milk; let soak until most of the moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderate oven (400 degrees F.) about 30 minutes.

Yield: Eight large muffins (three inches in diameter) or 12 small muffins (2 1/2 inches in diameter).

Note: When sour milk or butter-milk is used instead of sweet milk, use 1/4 teaspoon soda and only one teaspoon baking powder.

### Britain's New Tank

#### Lighter But Tough Machine Has Been Named The Covenanter

The latest British tank to be taken off the secret list, a 15 to 16-ton sister of the slightly heavier Crusader, has gone into mass production and has been named the Covenanter by Minister of Supply Lord Beaverbrook.

The Covenanter combines a speed of 30 miles an hour with remarkable manoeuvrability, excellent armor and formidable fire-power.

### A Good Explanation

Count Ciano, Italian foreign minister, has been explaining the determined stand of the Russians in the face of the German attack saying: "In order to understand the Russian resistance the Slavic racial qualities must be taken into consideration. These qualities are fundamentally great physical strength and exceptional psychology for tolerating hardships."

At St. Mihiel in the First Great War the allies fired 1,000,000 shells from one front in four hours.

People who are up and doing are never down and done.

### Canada's First Tank Brigade

#### Officer Commanding Is Proud Of The Troops He Leads

At a barren, isolated camp of the Canadian Army Tank Brigade, somewhere in England, Brig. F. F. Worthington is seeing a vision become reality as his troopers prepare for battle in the world's finest tanks.

For years in Canada this fiery, colorful brigade commander championed the tank as a weapon of war. Now as commander of the first tank brigade in Canada's history he leads one of the finest formations of fighting men ever to cross the ocean.

Over there they call it "Worthington's Brigade." It was organized and developed by this dynamo of a man who has been a prospector, miner, sailor and soldier of fortune who fought Pancho Villa in Mexico and served in the First Great War to win the Military Cross and Bar and the Military Medal and Bar.

Officers and men in the brigade are hand picked. The brigadier interviewed practically all of them. He knows his troops and they have spirited admiration for him.

The brigade confided the northland frontiers for recruits from trappers, hunters and caterpillar tractor drivers. These men have the endurance and vision that tankmen need. The brigade also went to the Prairies for farmers who worked all their lives with track vehicles.

It's 100 to 1 the brigade won't religiously follow orthodox tank practices. The brigadier has definite ideas on tank warfare and plenty of new angles up his sleeve.

Brig. Worthington, a native of Scotland, went to California in his youth, became a prospector and miner and then went to sea for 12 years as an engineer.

His wanderings took him to Central and South America where he fought in several revolutions, then joined the forces battling Pancho Villa. The First Great War took him to Canada and then to England.

In 1936 he was appointed chief instructor of the first Canadian tank school at London, Ont.

This was the start of the rise of the tank in Canada. Two years later the school was established in Camp Borden, Ont., and when armored formations were formed he received senior appointments and promotions, emerging as a brigadier commanding the present tank brigade.

### Devoted Heroism

#### Fatally Wounded Australian Offers Body As Shield

A Sydney (Australia) newspaper publishes a letter from an Australian officer who fought in the Libyan campaign telling of a warrant officer's devoted heroism when fatally wounded by an enemy shell. Knowing he could not recover, he crawled over to a Bren gun which was getting a severe peppering and said to the gunner: "Here, lad, use me as a shield." The gunner did so, and escaped injury.

Do we stop to think and to realize that in a very true and literal sense our fighting forces of land, sea and air are actually our one shield of defence from the bombs and shells of the enemy?—Halifax Herald.

## Drive out ACHEs

### A New Order

#### Says War Destroys Social Barriers In Britain

The war is tearing down Britain's social barriers and building a new order. Sir Gerald Campbell, director-general of the British information services, said:

"I have said that the man-in-the-street in Britain realizes that this is his war," the former British minister to the United States told the Commonwealth club at San Francisco. "He does, and the condition of Britain after the war is going to be his, too."

"A new order is on the march in my country, a new order, of which Adolf Hitler could not conceive. It is born of the air-raid shelters and among the auxiliary services, and in the fighting squadrons of the R.A.F.

"The flame of our common effort has burned away the barriers of class and caste which has so complicated the pattern of our social life, and has left us a people united as never before."

### Plastics From Coffee

#### Brazil Has Started New Industry To Take Care Of Surplus

Surplus coffee now burned in Brazil at an annual loss of \$1,400,000 is to be made into plastics materials, says Food Industries. Already a pilot plant is partially completed, which will produce 18,000 pounds of plastics daily from 215 bags of coffee. And soon work will start on a \$5,000,000 plant to make 500,000,000 pounds of plastics annually, which would make Brazil the world's principal producer of plastics powder. Perhaps somewhere in that field lies a partial solution to Canada's surplus wheat problem. Kitchener Record.

### Victory Buns

The underground "V for Victory" campaign sponsored by Britain among peoples conquered by Germany has reached South Bend, Indiana. A restaurant there is baking V-shaped buns. The restaurant is run by a Greek.

Because of the noise it made in flight, an airplane in Brazil has been nicknamed the tecote.

Authoritative records show no deaths from the bite of a tarantula.

## STOP Scratching Believe It Fast or Money Back

For quick relief from itching of eczema, pimples, athlete's foot, scales, scabies, rashes and other externally caused skin troubles, use fast-acting, cooling, antiseptic, liquid D. D. D. Prescription. Greaseless. Soothes irritation and quickly stops intense itching. 3c trial bottle postpaid, or money back. Ask your druggist today for D. D. D. PRESCRIPTION.

More convenient, Presto-Pack—the new type of package, always ready for use. Just hang a package in your kitchen, you will be pleased with its handiness.

With one hand pull out one or more sheets as wanted, the package keeps the remainder free from dust for future use.

Presto-Pack is the handiest form in which waxed tissue is sold.

## Summary Showing What Has Been Accomplished By Canada In War Effort

The August issue of the leaflet "Canada's War Record," put out by the Director of Public Information for wholesale distribution in the United States, is now available. A small, six-faced leaflet designed to be inserted into a passport or pocket-book, this concise encyclopaedia of our war effort is proving a useful weapon against ignorance.

It is designed for the U.S. and most of its 400,000 circulation is in the U.S.—to newspapers, financial houses, travel agencies, clubs and societies, all returning U.S. tourists—but it is as well a handy bit of paper for a Canadian, just the thing to pull out when loose argument is floating around about army strength or war finance. Anyone can get one on application to the office of the Director of Public Information.

Here, in brief, is what it tells:

There are now nearly 90,000 Canadian soldiers, sailors and airmen serving in the British Isles.

Another 210,000 Canadian soldiers, sailors and airmen have voluntarily enlisted for service anywhere for the duration of the war and are at present in Canada, in Canadian waters or in North American outposts.

This gives a total of 300,000 now on active service; 20,000 in the Navy, 220,000 in the army and 60,000 in the R.C.A.F.

During the remainder of 1941 Canada will dispatch overseas the 3rd Canadian Division, the 5th (Armored) Division, and other troops; increasing numbers of airmen, about 2,500 radio technicians and continuing naval reinforcements.

Some hundreds of Canadians are attached to the Royal Navy, and many Canadians are serving in the R.A.F. and in the British Army.

The Canadian Navy has more than 200 vessels of all types, many of which are serving around the British Isles and elsewhere overseas. By March, 1942, it will have about 400 ships.

The Canadian Navy has assisted in convoying ships carrying more than 27,000,000 deadweight tons, sunk enemy submarines, effected rescues, captured several enemy vessels, and caused others to be scuttled.

The Canadian Corps in Britain guards a vital sector. It has recently been reinforced with a tank brigade. Canadian soldiers have done useful work in assisting bombed

### Helps Plant Growth

#### New Drug Is Being Used In Plant Development

Sulfanilamide, the drug which controls germs deep inside the body now is being used to create new varieties of plants.

Hamilton P. Traub, horticulturist of the U.S. department of agriculture, says the drug and some of its chemical cousins, such as sulfapyridine, the anti-pneumonia drug, can be used in warping, twisting, doubling and re-doubling the chromosomes or hereditary determinants, in plants.

The whole era in plant development began when a group of young scientists, who were not mentally muscle-bound, began experimenting with soil-less agriculture. "Suppose," they said, "that we eventually have a soil depleted by centuries of cultivation, as many sections of the United States are worn out already. What could be used as a substitute?"

The problem was worked out independently in at least five laboratories and about three years ago it was found that by combining all the essential nutritive elements in the proper amounts in a water solution and rooting plants on a wire mesh screen superior flowers and vegetables could be grown.

#### Must Be Together

Royal Air Force doctors in Glasgow are trying to arrange for Jack and Lionel Horton, twin brothers, to be reunited because one of them is suffering from what is described as "frustrated twin complex." Both are R.A.F. ground crew men.

It takes a big man to admit he is wrong when he knows that he is.

areas, removing unexploded bombs, building defence works and roads and repairing communications.

Canadian airmen in the R.A.F. and in R.C.A.F. squadrons have shot down a large number of enemy planes. Others have engaged in bombing and reconnaissance work. A considerable number (11) of R.C.A.F. squadrons now operate in Britain.

The British Commonwealth Air Training Plan operates 68 schools out of 83 planned for September of this year. It has over 120 establishments of all kinds and operates about 100 air fields. Twice as many air fighters as originally planned for this time have been turned out, and a very large number have already arrived in Britain. One thousand radio technicians have arrived in Britain from Canada.

The estimated cost of the Air Training Plan for three years is now \$824,000,000, of which amount Canada's share will be \$531,000,000. Canada provides about 80 per cent. of the students. The remainder are mostly from Australia, New Zealand, and the United States. British airmen also train in Canada.

About fifteen hundred Americans have enlisted in the R.C.A.F. and 600 Americans are acting as instructors. Seven thousand Americans have joined the Canadian Army. Many of these are already overseas.

More than 1,200 Canadian sailors, soldiers and airmen are now listed as dead or missing. Of these, 736 were killed, 285 died and 195 missing.

Three hundred and forty-five have been wounded. Many Canadians have been decorated or mentioned in despatches.

Canadian citizens' voluntary aid to Britain in the form of money and needed articles for the victims of enemy bombing and in the form of funds for the purchase of war planes totals several millions of dollars.

Blankets, clothing, first aid equipment, ambulances, mobile kitchens and other services have been provided.

There are several Canadian hospitals in Britain staffed by Canadian doctors and nurses. Other Canadian civilians in Britain are rendering valuable service.

About 3,500 women are now being enlisted in the women's auxiliary services of the Army and Air Force.

L.N.S. in Ottawa Journal.

### About Termites

#### Super-Microphone Is Able To Detect Their Presence

We don't think we've ever been unduly friendly toward termites, especially the Fifth Column kind.

But after all, there was this to be said for termites. They were the last stand of privacy in a gold-fish-glob world. Termites worked silently and privately; nobody ever bothered termite, for the simple reason that nobody ever knew they were there until it was too late. They were able to enjoy their frugal repast of door-sill salad unmolested.

Now a super-microphone has been invented which makes the minuscule munchings of the termites sound louder than a man eating celery in a railway station restaurant. The termite's loss will be man's gain, but it is disconcerting to think that no living creature is any longer safe from the keen ear of the microphone—that even the termites have been tuned in—Calgary Albertan.

### The Whole Story

Returning from his day's toil to his happy little home, father greeted his family.

"What have you all been doing today?" he asked.

"I washed the dinner things?" said Ann proudly.

"And I wiped them!" exclaimed Sheila, just as proudly.

Father turned to his only son:

"And you, John?"

"I picked up the pieces," was the brief reply.

In 1694, the English admiral Russell, Earl of Oxford, prepared a toast to the King by filling a fountain with punch.

### Marks Development

#### Vaporizer Makes Sure Patient Gets Right Amount Of Anesthetic

A revolutionary invention in the field of anaesthetics, perfected by the Nuffield Institute of Research at Oxford, has been adopted by the government for use in the services.

The invention, an automatic machine which shows an anaesthetist the exact percentage of anaesthetic vapor his patient is getting, is known as the Oxford vaporizer and it replaces the present bulky cylinders used in administering anaesthetics.

To mark this development in anaesthesia, which ends a century-long medical search, Lord Nuffield has offered to provide 1,000 of the machines for the use of the services.

The vaporizer is practically fool-proof and is usable in the roughest conditions of warfare, in improvised field hospitals, in shattered ships, or in air raids.

The machines cost about \$112.50 each and are already being made in large numbers.

Describing operation of the vaporizer, the *Lancet*, British medical journal, said the patient breathes air through the machine in which ingenious use has been made of a chemical substance to provide the vapor of the liquid anaesthetic in exactly the desired concentrations.

### Future Of Canada

#### To Be One Of The Greatest Nations Of The World

Dr. Harold E. Conrad of Ottawa University, Kansas, predicts that Canada will emerge from the war as one of the greatest nations of the world.

"Collaboration between Canada and the United States as a result of the Ogdensburg and Hyde Park declarations has given the Canadian government a new status in American relations—that of an equal," he told a group at Boston University's summer school where he is visiting professor of history.

Post-war Canada, he said, will become a powerful force in British American relations.

"Together, all three will be a dynamic influence in the type of world which will be resurrected after Hitler is defeated," he asserted.

Dr. Conrad said, however, that the United States never should look for political union with Canada because of the Dominion's close alignment with the British Empire.

### Time To Make Good

One of the current jokes in the German air-raid shelters runs this way: "I wonder what dear Hermann will do tomorrow?" "Commit suicide again," comes the answer. It seems that Reichsmarshall Goering was once so imprudent as to declare that he would commit suicide if the British ever penetrated the aerial defences of Germany.

All Europe is now divided into three parts: occupied, unoccupied and preoccupied.

There are more than 450 kinds of woodpeckers in the world.

### Crochet This Set For War Relief

COPYRIGHT HOUSEHOLD ARTS, INC.

PATTERN 7045

Crochet this set for jacket, cap and booties for that special baby or do your bit for war relief. It's quickly done and inexpensive, too, in Shetland Floss or two strands of French Zephyr. Pattern 7045 contains instructions for making set; illustrations of it and stitches; materials needed; photographs of pattern stitch.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man.

There is no Alice Brooks pattern book published.

### Household Arts by Alice Brooks

#### An Easy Pattern Stitch — Inexpensive to Make

## Gasoline Restrictions Are Necessary In The Face Of Emergencies Of The War

### Some Laundry Tips

#### Cottons Are Divided Into Six Groups For Safe Handling

If your laundering is done at home, you'll find it easier to keep your cottons fresh by taking advantage of some of the "recipes" used at the laundries.

The experts at the laundry usually separate cottons into six general groups before they even think of washing them.

All pure whites go into one classification; those where white predominates go into another. And while pink and baby blue may be just ducky on the baby's bonnet laundry experts wouldn't dream of washing these two colors together.

Light pinks go in with lavenders, tans, oranges and yellows, while the light blues hobnob in the suds with the light greens and grays.

Dark browns, dark blues, purples, dark greens and blacks go into a fourth group, and dark reds and dark oranges form a classification all their own.

Temperatures for white cottons start at 100 degrees Fahrenheit and with each succeeding fresh supply of water and supplies, are increased to 160 degrees Fahrenheit. When some color is present but with white predominating, temperatures begin at 110 degrees and are increased sufficiently to clean the white areas and preserve colors.

### Cooking In Hawaii

#### For Special Celebration Leaves And Hot Stones Make Oven

How would you like your mother to cook a dinner in leaves? That is the way mothers do in Hawaii. When there is a very special celebration day, the people plan for a feast, and the first thing they need is an oven.

So a deep pit is dug in the ground, and everybody helps to line it with thick green leaves. The boys and girls are sent for stones, which are heated and put in the pit, on the leaves. Perhaps whole chickens are put in next, and a pig, stuffed with potatoes, or anything else to be cooked. If they want fish, they wrap it in leaves, so the juice will stay in. More leaves and more hot stones are put in, and the dinner is left to bake for three or four hours.

When it is cooked, all the men, women, boys and girls sit on the ground and the food is placed on the table-cloth of green leaves. Everyone says, who has tasted, that it is a grand dinner.

Between 330,000 and 350,000 additional Canadians have been absorbed into industrial employment since outbreak of war.

We could keep up with the Joneses more easily if the Joneses were not busy keeping up with the Smiths.

### Mexico Aids Workers

#### Committee Of Officials Tries To Make Women's Work Easier

Aid for the working woman who has a job and for women who are unemployed is assured through the combined efforts of the Ministries of Public Welfare, Labor, Education and the Interior and the Public Health Department in Mexico City. They have formed a committee of their own officials to seek ways and means to make working and private lives better for employed women and to find sources of work for women who must earn a living but fail to obtain jobs. Children of working mothers will be given proper care, fed, clothed and educated.

### Simple Mathematics

A girl of twenty who contemplates marrying a man of forty, says a clergyman, should remember that when she is forty he will be sixty. It is, of course, better for a girl of forty to marry a man of twenty, then they'll reach sixty round about the same time.

The famous German gun used to bombard Paris in the First Great War had a range of 80 miles. It cost \$8,000 to shoot a single shell.

Weed seed, buried deeply, will remain dormant many years and germinate readily if brought close to the surface by cultivation.

### First Wheat Delivered

The first new wheat delivered in Didebury was on Aug. 21st from the farm of Mrs. Opal Stauffer east of town. This wheat, straight combined, graded No. 2 and yielded 24 bushel to the acre after being haled 30%.

### Forms for Cement Pits are Available.

To assist in the construction of cement pits for toilets, the town have built several forms of a suitable size.

Any ratepayer wishing to use the forms can make arrangements with Mr. E. Kercher.

### Ford "T" Cars Quite Valuable

Model T Ford cars are reported at a premium in the Calgary area and prices have doubled and trebled in the last few days, as interest mounts in the one hundred mile "Tin Lizzie Sweepstakes" to be run off on Calgary's Victoria Park race track this Labor Day, September 1, under the auspices of the Lions' Club in aid of their war services fund.

Ancient "Tin Lizzies" that have felt the heat of many a blistering sun and refused to budge an inch on many a frosty morn, are feeling the splash of oil and gas in rusty interiors. Reversal activity is witnessed around garages, service stations and backyard lots as contestants groom their entries for the long struggle that is expected to test the courage and endurance of drivers and mechanics to the utmost, according to officials of the Lions' Club.

Aimed at raising funds for war services, the race itself is expected to provide exciting entertainment for spectators, with ribs-splitting comical situations as well as moments of genuine suspense—the rambling wrecks give them all in one final effort to win the first prize money of \$250.00. Winner of second prize will get \$150.00, with third prize of \$75.00 and fourth money amounting to \$25.00.

Plans are also under way to provide additional awards for the entry from the greatest number of miles away from Calgary, and for the most original paint job, as well as the oldest model entered.

### Huge Motor Levy Shown In Alberta

Alberta motorists provided the provincial government with \$3,500,000 of its revenue of \$8,237,000, during the first three months of the fiscal year that opened on April 1st, according to the interim financial statement for the period, issued recently by the provincial treasurer.

The statement is being studied by officials of the Alberta Motor Association, in view of the campaign initiated by the organization to induce the government to "ear mark all motor revenues for road purposes."

The financial statement shows that for the first three month period motor licences produced \$2,548,975 or an increase of \$316,923 over the corresponding period of the previous year.

The fuel oil tax act yielded \$1,026,999, or a gain of \$333,288 over a year ago.

Thus these two rich revenue sources gave the province nearly \$650,000 of increased revenue for the first quarter of the 1941-42 fiscal year. Possibly this showing will be improved as the year progresses.

With the province obtaining larger revenues, motorists are making insistent demands for greater outlays on tourist roads. They realize that these highways suffer in comparison with the fine paved tourist routes in the United States, over which the bulk of these tourists travel in order to reach Alberta.

The province continues to draw huge revenues from the motorists, now it should in return spend that money on the roads. That is the feeling of thousands of motorists. Few, if any of them, would grumble if it were felt that the motor revenues despite the load they place on the taxpayer, were being spent on the roads, where it was intended originally that they should be spent.

### LOCAL & GENERAL

Mr. and Mrs. A. Brusso left on Sunday for a short vacation in the Banff National park.

Miss Doris Brown of Calgary visited with Mrs. J. Cummins and family last week.

Mrs. Harris of Edmonton is visiting with her mother, Mrs. E. G. Reitzel, for a few days.

A.C. Bob Barrett who is stationed at McLeod was home on leave this week.

Pte. Eddie Thorn called on friends here enroute to Niagara Peninsula, having been home on furlough.

Miss Lois Edwards of Calgary visited her home here a few days last week.

Bert Buhr returned home on Friday after undergoing an operation for appendicitis in a Calgary Hospital.

Major Jenkins, R. Q. M. S., Kemp, and Sgt. Ins. Wyatt visited the local detachment of Light Horse on Sunday.

A call has been sent out for men for enlistment for Army Trade Training School. Anyone interested should see Sgt. Maj. Garner.

Mr. and Mrs. Carr Sanderson of Storm Lake, Iowa, is visiting with the former's brother, Mr. Lee Sanderson and family. They will also visit other relatives in Alberta.

Pauline Holbrook has returned from attending the University of Beauty Culture at Edmonton and wishes to announce to her patrons—"the very latest in styles in hairdressing."

Norman Crimmon, who has been with the Builder's Hardware at Carbon has enlisted with the navy. Glen Levagood who has been working in the store here will take Norman's place at Carbon.

Mrs. Eva Hopkins, who has been visiting her mother, Mrs. Geo. Sexsmith, for the past few weeks, left for her home at Los Angeles on Tuesday.

We have just received another shipment of those big roomy \$1.00 shirts—at Scott's.

John and Billy Parker returned Friday from a visit with their uncle, W. L. Parker at Pincher Creek. They also had a good time fishing in the Old Man River.

K. Roy McLean, optometrist and optician, will be at the Rosebud Hotel on Monday morning, Sept. 8th Wednesday to Saturday consult at 210 Southam Building, Calgary.

George Kercher left on Monday for Calgary, having received his call for the Air Force. After visiting a few days in the city, he left for the Brandon Manning pool.

Wendell Gochee has taken a position with the Adshead Garage. In point of service Wendell is the oldest motor mechanic in the district, and for a number of years was a partner in the X-L Motors.

Mr. and Mrs. Rex Laird of Redondo Beach, California, called on Mrs. Jack Hislop on Monday enroute home from visiting at Edmonton. Mrs. Hislop and Mrs. Laird were High School chums in Los Angeles.

For Sale—Hand Power Washing Machine and Wringer. Good Shape \$8.00 cash.

Inquire at the Pioneer Office.

The cry for a change in government policy is gaining support. Before long, this demand will force government recognition, in the opinion of A.M.A. Officials.

The Christian Science Publishing Society One, Norway Street, Boston, Massachusetts Price \$12.00 Yearly, or \$1.00 a Month. Saturday Issue, including Magazine Section, \$2.00 a Year. Introductory Offer, 6 Issues 25 Cents.
